Document cited in the International Search Report: D1: US 6151677 A

The cited document represents the general state of the art. The invention defined in claims 1-6 is not disclosed by this document.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed system in a digital wireless data communication network for arranging end-to-end encryption or digital wireless terminal equipment. Especially, the dynamic application based on a program is new in view of the state of the art technology as represented by the document D1. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-6 is novel and is considered to involve an inventive step. The invention is industrially applicable.
